ASI (from AMSR2) ver. 5.2, Grid 6.25 km

A horizontal color scale representing Ice Concentration from 0% to 100%. The scale is divided into 10 segments of 10% each. The colors transition from dark blue at 0% to black at 45%, then through green, yellow, orange, and red to dark purple at 100%. Two arrows point to the 45% mark.
